

Supporting Ukraine – Basics of Process Validation in Medical Devices

Motivation

Shocked by the horrible pictures from the war against the Ukrainian people I'd like to get active in raising money. Therefore, I decided to offer my time for your online training to support humanitarian aid for Ukraine.

I will offer **60 minutes with additional 30min questions and answers**. Within this time, I can deliver **basic knowledge of process validation** to your teams including the following contents:

- Regulatory background from ISO 13485:2016,
- Meaning of key elements IQ, OQ and PQ, and
- Practical examples.

Dates

You can choose from the following days and you can pick any time:

- April 28, 2022 (pm only)
- May 5, 2022 (am and pm)
- May 13, 2022 (am and pm)

Organization

An email or better a phone call would be sufficient to get the online training agreed upon. In order to make administration as simple as possible, you will be asked to setup your online tool (like MS teams) and you will have to organize your participants. It is up to you to determine the number of participants and we can do it in German or English language. After the training you will get one training certificate for your records.

Supporting Ukraine – Basics of Process Validation in Medical Devices

Payment

I'd like to organize the online training as a kind of prepaid charity activity. If you want to book my time for your event, you will complete your donation upfront of the online training directly to the charity organization. This actually means that I'll not be involved at all in your donation and I will not take any advantage of it or responsibility for it. Any tax advantages will stay with your company.

An email to me with evidence of your donation upfront of the online training will be sufficient. It is up to you how much you want to donate and I will deliver the training for any donation of **minimum 300€**.

Possible charity organizations are, for example,
